

## DIVERSION / RECYCLING RATES FOR LOCAL MIXED C&D PROCESSING FACILITIES - November 2011

StopWaste.Org does not endorse the use of any one facility over another. Diversion rate information is provided by the processing facilities and is not third party verified. StopWaste.Org conducted site tours of each facility to ensure that equipment and procedures were in place to process materials as identified in their diversion reporting and documentation. Diversion/Recycling rates are based on a one year reporting period (unless otherwise noted) relating to the processing of mixed C&D materials, not on source separated C&D materials (which may also be accepted and/or processed at the facility at a different recycling rate). StopWaste.Org selected facilities based on requests from Alameda County city representatives who identified facilities as processing C&D materials from Alameda County projects.
