Take the

2015 Multifamily Green Property Management Training

in Emeryville, May 18, 19, 20, 21 (+ 22 exam) 2015

This training is designed to help you obtain funding and certifications:

Building Performance Institute Multifamily Energy Efficient Building Operator: This nationally recognized certification helps building operators, property managers and other building professionals to stand out amongst their peers. The certification demonstrates conceptual understanding of building performance science and the relationship between all of the various building systems and its effect on occupant health, safety and comfort, energy efficiency and durability. The certification requires proctored written and field exams, which will be offered as an option in conjunction with this training for those who wish to pay for and pursue BPI professional certification.

Low-Income Housing Tax Credit Points; TCAC Sustainable Building Methods for Rehabs: This training and the BPI Multifamily Energy Efficient Building Operator (MFEEBO) certification satisfy the requirement for optional Operations and Maintenance points in State Treasurer Tax Credit Allocation Committee's sustainable scoring criteria for Rehab projects. You must take the full training plus the written exam and field exam (to be scheduled separately) in order to earn the BPI MFEEBO certification.

Green Business Program Property Management Certification: This training counts toward the professional certification requirements for the Bay Area Green Business Program checklist for property management companies. Learn more at www.greenbusinessca.org.

GreenPoint Rated Existing Home Multifamily Certification: This training counts toward the optional Operations and Maintenance points available on Build It Green's GreenPoint Rated checklist to earn green building certification for existing multifamily buildings. Learn more at www.greenpointrated.com.

"Great class. Opened my eyes to a lot of things I need to make note of."

"Best training on green operations and maintenance practices and standards that I have attended."
