

DIVERSION / RECYCLING RATES FOR LOCAL MIXED C&D PROCESSING FACILITIES - December 2014

StopWaste.Org does not endorse the use of any one facility over another. Diversion rate information is provided by the processing facilities and is not third party verified. StopWaste.Org conducted site tours of each facility to ensure that equipment and procedures were in place to process materials as identified in their diversion reporting and documentation. Diversion/Recycling rates are generally for a one year reporting period (unless otherwise noted) relating to the processing of mixed C&D materials, not on source separated C&D materials (which may also be accepted and/or processed at the facility at a different recycling rate). StopWaste.Org selected facilities based on requests from Alameda County city representatives who identified facilities as processing C&D materials from Alameda County projects.

Roll over column headings for definitions								Diversion including ADC	Diversion w/out ADC	Diversion w/out Beneficial Reuse	Diversion w/out BR and ADC	Beneficial Reuse %	ADC %	
Total Tons Received	Recycled	Composted	ADC	Other Beneficial Reuse	Mulch	Bio Mass	Disposal							
FACILITIES OPEN TO THE GENERAL PUBLIC														
BERKELEY TRANSFER STATION <i>(Data from 2 mixed C&D sorts, performed at Davis St)</i>	242	21		13	111	25	43	26	88%	83%	42%	37%	46.0%	5.0%
