# SB 1383 and the Organics Reduction & Recycling Ordinance

## Background

When food and plant material break down in a landfill, they release methane, a harmful greenhouse gas and leading cause of climate change. To respond to the climate crisis, California passed Senate Bill 1383 to reduce the amount of food scraps and other compostable materials sent to landfills by requiring everybody in the state to compost and recycle. Many businesses and multifamily properties have already set up successful programs.

In Alameda County, the State law is being implemented and enforced under the Organics Reduction and Recycling Ordinance which was passed by local government agency StopWaste. StopWaste partners with the cities of Alameda County, their solid waste service providers, and environmental health departments to help sites comply and enforce the law when needed.

## Overview of the Rules

Businesses (including nonprofits and institutions) and multifamily properties (5+ units) must:

1. Subscribe to compost (organics) and recycling collection services.
2. Place color-coded and labeled recycling and compost bins next to all garbage bins (not required in restrooms).
3. Sort materials into the proper bins.
4. Educate employees, contractors, and tenants about the law at least annually and check bins periodically.

In addition to the steps above, some businesses that generate surplus edible food—such as grocery stores, food distributors, and large restaurants—must donate their surplus edible food to feed people.
