

STOP WASTE

May the 4Rs Be With You Contest 2024

Anvita, Aanya, Divya, and Elyse 5th grade, Fremont

Our 4Rs: REduce, REfuse, REstore, and REplant

Revive the Earth

*All of us need to save the world right now,
We need to come together to save Earth,
We'll reduce plastic waste, this we will vow,
So we can restore our planet's great worth.*

*To save our dear home, we all need to help,
By replanting where the land is in need,
An example is planting lots of kelp!
As you can see, planting is a good deed.*

*Although many good things are taking place,
We humans are the most dangerous chance,
Climate change is taking up our airspace,
We'll refuse to let climate change advance*

*Wasting stuff is something we won't allow,
Therefore, the world has to be restored now!*

Our (Re)Generation Action Story:

We are always trying to make the world a greener place, and by spreading awareness and helping people be more eco-friendly. Our 4rs are REduce, REstore, REplant, and REfuse. We specifically chose REduce because we believe reducing our waste is one of the most important things we can do. We chose REstore because we think that in order to help the Earth, we have to restore our ecosystems. We chose REplant because planting trees is one of the key things in order to help the planet. Finally, we chose REfuse because refusing plastic items will help in a small but significant way.
