May the 4Rs Be With You Contest 2021

My 4Rs: Rethink, Reimagine, Reuse, Recycle

My (Re)Generation Action Story:

The rs are rethink reimagine reuse and recycle. This connects to rethink because before all the humans there would be a bunch more trees and no building with is rethinking. It also connects to reuse because the wood of the trees is limited so you will have to reuse as much as possible.it connects to reimagine because you remagine when there was a bunch more trees. It connects to recycle because you want to recycle things made out of wood for then they don't get wasted and the tree was well cut down for no reason.and this photo is about nature. Also the red sky symbolizes lava and destruction because climate change is heating the earth and Antarctica and the ice on Greenland
