Our (Re)Generation Action Story:

Recycle, reuse, reduce, and RE-EDIT! We get inspired about the little sweet adventures within our daily life, and what our environments have to offer. In this case, it's learning about 4 leaf clovers. There's so many varieties and genetic variations. So we went hunting to see if you're get lucky enough to find one. In best case possible, we were lucky to find two 4 leaf clovers in the same batch within 2 weeks span. On our adventure, we originally went to check on the first four leaf clover and see if it was still there (after a heavy rainstorm). We found it, unfortunately it didn't withstand the rainstorm. However, we found a second within the same batch area. It was such a lucky experience. Therefore we documented and made an extended video edit and created our music beats that truly inspired by our 4 leaf clover's adventures. We hope you enjoy.
