Honorable Mention Elementary Illustration

### My 4Rs: Remind, Rethink, Reduce, Replace

### My (Re)Generation Action Story:

I think we can REMIND all people of our bad doings. I think we can RETHINK after we are done doing things. I think we can REDUCE the amount that is wasted. I think we can REPLACE the bad and put in good things.

# David's Story Continued:

My picture shows half and half of what we can do. I put a house WITHOUT a chimney with smoke to show the good and the house WITH a chimney and smoke coming out for pollution. I put the animal in the good side to show even animals like the good rather than bad. I put it raining on one side to show that even with water it will not grow if you decide to leave what you have done to nature. I put a robot on the bad side to show that the robot doesn't like it either, I put a human on the good side to show that he likes it better there and he is helping it by biking. I put it by making it look like it transforms into one another and how easily it can be changed.

How I made this picture is by first thinking like it should be a trash dump and two people side by side saying go green! but then I realized that I should come up with my own idea and it turned out great!
