BUILDERS' GUIDE

TO REUSE & RECYCLING

Reduce

Reuse

Recycle

A Directory For Construction, Demolition &
Landscaping Materials

2007

**THIS GUIDE HAS BEEN DEVELOPED TO
HELP ALAMEDA COUNTY BUILDERS,
CONTRACTORS AND RESIDENTS REUSE
AND RECYCLE CONSTRUCTION AND
DEMOLITION MATERIALS.**

Every year, more than 355,000 tons of construction and demolition materials are unnecessarily disposed of at Alameda County landfills.

A case study of a single-family housing development in Alameda County showed that 86% of the “waste” generated on the project could be recycled. Most construction waste is wood, drywall, metals, plant debris, concrete/dirt and cardboard — materials that can be reused or recycled if prepared properly. Use this Guide to find out how and where to recycle Construction and Demolition (C&D) debris.

All information contained in this directory is supplied by vendors. Because the industry is constantly changing, some facilities may have reduced or expanded the types of materials they take. Make sure you find out the terms and conditions that are required for certain materials.

ALWAYS CALL ahead to confirm hours of operation and assure acceptance of materials you wish to recycle.

STOP WASTE . . . BEFORE IT STARTS

CONSIDER THESE TIPS:

REDUCE

- Use practices such as advanced framing, to minimize the amount of materials used.
- Avoid leftovers — measure twice and cut once.
- Choose materials that are durable so you don't have to replace them frequently.
- Use energy efficient practices and products for construction, operation and maintenance of buildings.

REUSE

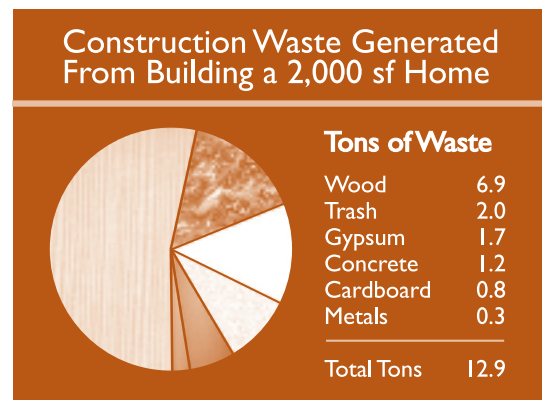

- Instead of traditional demolition, consider salvage and deconstruction, by selectively and carefully removing materials for reuse. See page 15 for a listing of deconstruction contractors.
- Consider remodeling or retrofitting existing buildings for new use.
- Allow time in your schedule for salvage and recycling.
- Use salvaged materials in remodeling or construction.
- Donate surplus materials.
- Visit material exchange outlets on line such as craigslist.org and freecycle.org. A comprehensive listing is available on page 26.

RECYCLE

- Most recycling plans succeed if someone in the company takes responsibility for the program. Assign a member of your crew.
- Recycling can save you money. Any extra time spent on separating materials will be reduced, as your crew becomes more experienced.
- Clean loads are the key to successful recycling. Be sure that your idea of a "clean" load is the same as your recycler's.
- Request subcontractors to source separate and participate in your recycling program.
- Early on, set up the site locations for recycling. Color-code or use large signs to help the crew use recycling bins effectively.
- Batteries — it is illegal to throw away all types of batteries as they are now considered hazardous waste. Please take the time to locate your nearest recycling outlet on page 5.

USE RECYCLED MATERIALS

Recycled content building materials such as insulation, plastic lumber and tiles are available locally, priced competitively and perform as well as their traditional products. For information on where or how to buy recycled building products, visit www.BuildItGreen.Org to search the AccessGreen Directory to locate suppliers and service providers of green building products within the 9-County San Francisco Bay Area. You can also contact them at 510-845-0472. Remember...You're not really recycling unless you buy recycled!

GREEN BUILDING

Green building is an increasingly important global concern and a critical component of this agency's mission is to conserve natural resources and reduce the amount of materials going to our landfills. In addition to savings on waste disposal costs, through recycling and waste prevention, owners and occupants of green buildings enjoy a wide variety of other benefits, including reduction in energy and water costs and reduced exposure to toxic substances found in certain building materials.

Green Building in Alameda County, in partnership with the building industry, has developed several guidelines to assist builders and homeowners on ways to build, remodel and landscape in an environmentally sound manner. Learn more on how to:

- Use healthier and durable building materials
- Reduce energy use
- Conserve natural resources
- Minimize construction waste

Copies of the Green Building Guidelines are available at www.BuildGreenNow.org

ADDITIONAL GREEN BUILDING RESOURCES

Build It Green
Smart Solutions From The Ground Up

is a professional non-profit organization whose mission is to transform the building industry so that buildings are remodeled and built using green practices and products. They are dedicated to creating healthy, durable, energy and resource-efficient buildings in California to sustain and enhance the quality of our lives and future generations. They have a variety of resources to help green any project. Visit www.BuildItGreen.org to learn more about:

- *Access Green — Product and Supplier Directory:* This materials database lists products, local suppliers, and service providers that correspond with the Green Building and Bay-Friendly Landscaping guidelines. The database is regularly updated to reflect the local availability of materials, development of new materials, and other newly available information.
- *Green Building Professional Certification:* Build It Green offers a training which provides a comprehensive overview of the core principles of green building; energy conservation and efficiency, resource conservation and improved indoor air quality.

GreenPoint RATED
A building performance score that matters.

- **GreenPoint RATED** Think of GreenPoint Rated as a report card for new home construction. A GreenPoint Rated home is graded on five categories — Energy Efficiency, Resource Conservation, Indoor Air Quality, Water Conservation and Community. If the home meets minimum point requirements in each category and scores more than 50 total points, then it earns the right to bear the GreenPoint Rated label. Because GreenPoint Rated homes are evaluated by independent, certified raters, building professionals and homeowners can feel confident that the rating has integrity and value. **The average home built to GreenPoint Rated standards, including recycling C&D waste, saves 2.5 tons of carbon dioxide emissions every year.**

LEED (Leadership in Energy and Environmental Design) Commercial and Residential Green Building Rating System: www.usgbc.org

PLANING ON REMODELING: THINK GREEN

Here are five easy low/no-cost ways to start building green:

- Use low/no VOC (volatile organic compounds) paint, adhesives, and finishes.
- Install compact fluorescent bulbs.
- Install water-saving devices.
- Select Energy Star® appliances and furnaces.
- Use recycled-content products.

What YOU can do!

- Identify what aspects of green building are important to you.
- Talk with your contractor and architect about building green.
- Ask your local supplier to stock green building products.

BAY-FRIENDLY LANDSCAPING & GARDENING

Bay-Friendly Landscaping & Gardening means working in harmony with the natural eco-systems of the San Francisco Bay Area to foster soil health, reduce runoff and pollution, prevent and reuse plant waste, and conserve water and other natural resources.

Copies of the Bay-Friendly Landscaping and Gardening Guidelines available at www.BayFriendly.org

In Alameda County, over 110,000 tons of plant debris are landfilled annually. Reducing waste starts with not generating it in the first place. Selecting the right plants for the right place as well as watering and fertilizing judiciously are important ways to reduce plant waste. Recycle plant debris by reusing it on site through mulching, grasscycling or composting or keep plant debris separate from other materials for a “Clean Green” discount.

Recycled mulch is an important part of Bay Friendly landscaping. By using recycled mulch, landfill space is conserved, local soils are improved and healthier landscapes are created, naturally. Tree companies offer free arbor chips or you can purchase recycled mulch from several different sources. Refer to the Bay-Friendly Landscaping guide to Mulch at www.stopwaste.org/docs/mulchguide-2006.pdf for a comprehensive resource list.

Most local transfer stations offer a discount for recycling plant debris if it is kept separate from other types of waste. With large quantities, consider dedicating a bin to plant debris only and asking for a reduced fee.

Bay-Friendly is a program by StopWaste.Org and offers materials and workshops for residents and landscape professionals. Printed materials can be ordered or downloaded as a pdf at www.BayFriendly.org

CONSTRUCTION & DEMOLITION DEBRIS RECYCLING ORDINANCE

Construction and Demolition (C&D) materials still occupy a large percentage of our landfill space. Building activities have been cited as one reason why landfill volumes have been increasing, despite expanding recycling efforts by local jurisdictions.

One strategy to reduce this waste is to require maximum feasible recycling at new construction and demolition sites. In November 1999, the Alameda County Waste Management Authority Board endorsed a Model Construction & Demolition Ordinance requiring contractors to divert at least 50% of their construction waste materials from the landfill. Building and demolition permit applicants are required to fill out a standard Waste Management Plan, outlining the estimated amounts and types of waste to be generated, reused, recycled and disposed. Applicants may also be required to submit proof that materials have been reused or recycled.

Driven by the large amount of construction activity, many cities have adopted C&D Ordinances based on the Agency's model. As of July 2007, the chart below identifies the Cities in Alameda County that have C&D ordinances in place

Alameda	<input checked="" type="checkbox"/>	Newark	<input checked="" type="checkbox"/>
Albany	<input checked="" type="checkbox"/>	Oakland	<input checked="" type="checkbox"/>
Berkeley	<input checked="" type="checkbox"/>	Piedmont	<input checked="" type="checkbox"/>
Dublin	<input checked="" type="checkbox"/>	Pleasanton	<input type="checkbox"/>
Emeryville	<input type="checkbox"/>	San Leandro	<input checked="" type="checkbox"/>
Fremont	<input type="checkbox"/>	Union City	<input checked="" type="checkbox"/>
Hayward	<input checked="" type="checkbox"/>	Castro Valley Sanitary District	<input checked="" type="checkbox"/>
Livermore	<input checked="" type="checkbox"/>	Oro Loma Sanitary District	<input checked="" type="checkbox"/>

The County of Alameda also requires C&D recycling for County-owned projects, regardless of location.

Visit www.BuildGreenNow.org for a copy of your jurisdiction's C&D ordinance.

Find out what your city's recycling requirements and hauling restrictions are prior to initiating a project.

StopWaste.Org's Recycling Guide

It's chockfull of ways to reduce, reuse and recycle almost any type of household material. It's a comprehensive directory of what is recyclable and locations to recycle. You can also access this information by going to the interactive **Recycling Wizard** at www.stopwaste.org

You are making a difference!

Thanks to County residents and business involvement in the 4Rs—reduce, reuse, recycle, and rot (compost) — every year the amount we recycle continues to increase. With your help, waste diverted from our landfills keeps rising, from a mere 12% diverted in 1990 to 54% in 2004 to a whopping 60% in 2006. Together we can reach our goal of 75% by 2010. That 60% waste diversion translates into more than 2,000,000 tons of waste diverted from landfills, which means water and energy saved and an improved environment in the Bay Area.

HOW TO USE THIS DIRECTORY

Each vendor listed in this directory has supplied us with detailed information about the types of materials they accept, when and where they accept the materials, as well as if they charge or perhaps buy the material. This information has been abbreviated for the guide — below you will find the descriptions for each of the abbreviations

Fee

There will be some type of fee levied by the vendor to accept material.

Drop-Off

Vendor will accept materials to be delivered/dropped off at facility.

Pickup

Vendor offers services to pick up materials from a specified site.

Buyback

Vendor will pay for specified materials.

Often these descriptions are coupled together to better describe their services:

Buyback/ Drop-off

Vendor will purchase specified materials dropped off at facility.

Buyback/Drop-off/Pickup

Vendor will purchase specified materials dropped off at facility and/or purchase material picked up from a specified location.

Fee/Pickup

Vendor will levy a fee to pick up materials.

Fee/Drop-off

Vendor will levy a fee to accept materials at facility.

Appliance — Reuse

DELTA SCRAP/SALVAGE 1371 Main St.
925-754-1474 Oakley

Batteries

It is illegal to throw away batteries – all batteries including NiCad, NiHim, Li-ion, rechargeable, household and flashlight batteries are recyclable. Although currently you can't recycle them via your household curbside recycling program, there are many places that will take them for recycling which you may visit on a regular basis. The following retail stores accept batteries for recycling:

- Radio Shack
- Office Depot
- Orchard Supply Hardware
- IKEA
- Target
- Whole Foods
- Staples

In addition, some local hardware stores also offer battery recycling services. Always call ahead to verify what types of batteries are accepted for recycling. For a comprehensive listing, visit the recycling wizard at www.stopwaste.org

Building Supplies & Salvage

Donating and/or buying used and reusable building materials is an important way to help keep valuable resources out of landfills. Buying from these businesses conserves resources and sustains job trades and skills.

Hazardous Waste & Materials

You may encounter hazardous waste and materials on a regular basis. The materials listed on this page **CAN NOT** be recycled using curbside recycling or placed in the trash, rather they must be recycled by a specialty recycler listed on the next pages.

- Asbestos
- Aerosol Cans (non empty)
- Batteries (all types)
- Contaminated Soils
- Fluorescent Lighting Tubes and Ballasts *
- Herbicides and Pesticides
- Mercury Thermostats (found in older homes)
- Paints, Stains, Thinners and Solvents
- Painted and/or treated Wood, Railroad Ties
- Fuels such as Gasoline and Kerosene
- Propane Tanks

* As of February, 2006 it is illegal for residents or businesses to dispose of any fluorescent lamps and tubes in the garbage; they must be sent to an authorized recycling facility or household hazardous waste facility. ALL fluorescent lamps and tubes are considered hazardous waste when they are discarded because they contain mercury. High intensity discharge lamps (HID) such as floodlights used as large indoor or outdoor lights also contain mercury and need to be recycled. Mercury containing lamps and tubes break when collected for disposal and the mercury is released into the environment. Carefully store lamps and tubes in a dry, contained storage area away from rain, so that if they do break, the mercury will not be washed into nearby waterways. Take care to not break fluorescent lamps or tubes when storing and transporting them.

Hazardous Waste & Materials Continued

If you do accidentally break a fluorescent lamp or tube, **NEVER VACUUM UP THE BREAKAGE**. This will only disperse the mercury throughout the area in the exhaust from the vacuum. Wipe up debris with a wet paper towel and then place the debris including the paper towel in a Ziploc bag or other airtight container, label the container and bring to a household hazardous waste facility.

Materials Exchange — Reuse

Materials Exchange Outlets are places to donate or find useful items. The possibilities are endless . . . building materials, lumber, sinks, hardware, remnants, computers, tools . . . the list goes on.

CALIFORNIA MATERIALS EXCHANGE (CALMAX)

877-520-9703

www.ciwmb.ca.gov/calmax

You can place a free advertisement or shop. Most materials are available at no cost.

CRAIGSLIST.ORG

Craigslist.org is a free, uncensored bulletin board that allows for the exchange of goods and services. This site is an excellent resource to locate used building materials and supplies, appliances, furniture for the Bay Area.

EXCESS ACCESS

www.excessaccess.org

A non-profit on-line donating service that matches a variety of items and materials from businesses/households with wish lists of nearby non-profits and recyclers that can provide pickups.

FREecycle.ORG

Freecycle's goal is to reduce waste by connecting people who are throwing away unwanted items with others seeking the same items. Each local group is moderated by a local volunteer. ALL items must be 100% free! All information is exchange electronically. Visit freecycle.org for membership information.

Materials Exchange — Reuse Continued

iREUSE

www.iReuse.com

iReuse facilitates the most efficient, cost effective, socially responsible, and environmentally friendly process for the resale, reuse, and removal of your unwanted business furniture, computers, and materials. iReuse will provide you with complete reporting and tax receipts for all donations. Serving the San Francisco Bay Area.

RECYCLER'S WORLD

www.recycle.net

An on-line trading site for information related to recyclable items, by-products, used and surplus items.

Mixed C&D Debris

Mixed C&D is a variety of building materials generated from the job-site that are not separated for recycling but rather mixed together. In many circumstances it is more economical to handle debris such as concrete, wood and metals in clean loads of separated materials and deliver them to appropriate recycling facilities. However, space and/or time constraints on certain jobs may not allow for clean loads and it may be necessary to haul away mixed loads of wood, wallboard, metals, insulation, plastics, roofing, etc. When you need to recycle mixed C&D contact the following facilities:

TO REUSE & RECYCLING

A Directory

for

Construction

Demolition &

Landscaping

Materials

Green Building in Alameda County is a program of StopWaste.Org, which is the Alameda County Waste Management Authority and the Alameda County Source Reduction and Recycling Board operating as one public agency. This directory is provided as a public service by Green Building in Alameda County, in an attempt to provide environmental benefits to the public. The information provided in this directory is not a substitute for the exercise of sound judgment in particular circumstances and is not intended as recommendations or endorsements for particular products, processes or service providers.

To add your business in future editions of this directory, or to suggest changes, please call the Alameda County Recycling Hotline at 1-877-STOPWASTE (1-877-786-7927) or send your comments via email: info@stopwaste.org

To download a copy of this guide, visit www.BuildGreenNow.Org.
July 2007

Green Building in Alameda County

Debris from construction and demolition projects comprises over 20% of the materials disposed in Alameda County landfills. To reduce this waste, Green Building in Alameda County has formed a public/private partnership with the construction and building industry. Green Building in Alameda County is a program of StopWaste.Org.

StopWaste.Org is the Alameda County Waste Management Authority and the Alameda County Source Reduction and Recycling Board operating as one public agency. The Alameda County Waste Management Authority is a public joint-powers agency comprised of the County of Alameda, each of the fourteen cities within the county, and two sanitary districts that provide refuse collection services. Together with its specialized arm, the Alameda County Source Reduction and Recycling Board, the agency offers many programs in the areas of public education, green building, recycled product procurement, waste reduction, and market development.
