May the 4Rs Be With You Contest 2020

Reduce, Reuse & Recycling Plastic!

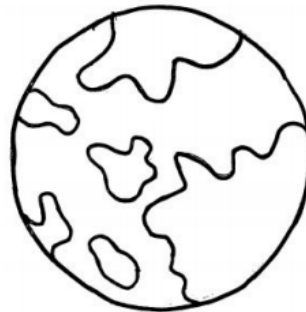

Ways To Reduce Plastic

1. Avoid plastic water bottles, instead try to use reusable ones.
2. Switch to plastic free chewing gum. An example is Glee gum.
3. Instead of using plastic straws, use paper or metal ones.

PICK IT UP!

Did you know that as many as 100 million marine animals die each year from plastic being dumped in the ocean?

Plastic Pledge

Plastic is harmful to the earth we live on

Sooner or later our earth will be gone

It'll destroy our planet, and take the places we roam

So let's take a pledge to save our home

I, (say your name), pledge to reduce the use of plastic

By using reusable bags,

By giving up an item or items with plastic,

And by picking up trash that I find lying around

We can save the earth!

Our 4Rs Reflection

Reduce, Reuse, and Recycling plastic! My students created this flyer in order to help bring awareness to the over use of plastic. This was to be shared with all Ardenwood students on Earth Day. Due to the school closure we were unable to distribute this to other classrooms. We are hoping to send these out to parents, teachers, and students next year!
