Our (Re)Generation Action Story

I, Celine and Sophia learned how to save the Earth by following 4 words: Reduce, Reclean, Reuse, and Rebuild. This movie tells how they use these words to stop waste on Earth.

Celine forgets to turn off the lights, but she learns that she must Reduce how much electricity she uses each day to stop pollution.

When traveling along the river, Sophia and Celine notice the trash in it. They spend some time to clean the waste in the river, and they learn to Reclean the trash when they see it.

Sophia and Celine gets some tea, but they decide to use reusable cups to avoid creating plastic waste and affecting water.

Celine decides to build a rocket ship using extra cardboard that was going to be thrown away. This not only stops waste, but can be used to go to space.

These ideas can help prevent waste on Earth and help save it.
