### My 4Rs: Replant, Recreate, Remember, Reinspire

#### My (Re)Generation Action Story:

Even though the earth is a big planet, small steps can lead to saving and protecting it. Replanting trees and other plants give back to the earth by releasing oxygen into the air. We can Recreate new things using items that would've been thrown away, like rugs, shirts, and soap using plastic bottles. We should Remember to not waste water or electricity as that also harms the environment. Lastly, we should Reinspire others to take these steps, just like others have inspired us. If we all take these steps, we can slowly change this big planet.
