My (Re)Generation Action Story:

I Recreated a perfume after I saw lots of flowers (roses) falling on the ground in my backyard, it was beautiful color of roses, but it was just a waste. So I want to Repurpose the petals of the flowers. I had an idea to Recreate a perfume from the flowers. I Reuse the plastic bottle water to put the perfume in. Not forget to put a food coloring with strawberry flavor, just to have a nice color and a good smell. Then, the Result is a Strawberry Perfume.
