My (Re)Generation Action Story:

Keisha has lots of toys and we try to teach her to give some of her toys to friends and donate to other kids. She is learning not to throw away her toys and use them gently so that other kids can enjoy them.

She Reused from the used paper to make some things or drawing (she used her sister's papers 😊)

In addition, she has some broken toys that we told her try to fix it before throwing away . So she learns how to fix it, like using glue / tape to Repair it. She is learning to reduce waste for our earth.
