My (Re)Generation Action Story:

I want to protect the earth by Reusing my bottle water and Refilling it with water every day. However, we can Recycle the plastic water bottles too. It is better to Reduce the waste by reducing the use of single use plastic water bottles. And we can protect the earth by sorting the trash that we toss. It is remind us to throw the trash in the right bin: organics, recyclables, or landfills. We can do these little things to protect our Earth for the next Generation.
