Scholarships are limited, so apply today!

The course provides landscape maintenance professionals with:

- An understanding of ReScape's ecologically based, comprehensive approach to the management of public and private landscapes
- Hands-on experience with practical, effective techniques such as sheet mulching to transform lawns into Bay-Friendly landscapes
- Knowledge of habitat restoration, local plant communities and the benefits to bio-diversity
- Techniques for water conservation, reducing runoff and maintaining stormwater systems in the landscape
- Techniques for controlling pests and weeds with organic and integrated pest management strategies
- An understanding of the global connections between soil health, waste management, water conservation, air and water quality, Green House Gas reductions, urban forestry and carbon sequestration
- A competitive advantage in the professional landscape maintenance marketplace
- A completed prerequisite to participate in the ReScape California Rated Landscapes Program and earn your Rater credential
