MAY THE 4RS BE WITH YOU CONTEST 2022

Our 4Rs: Reuse, Regrow, Reduce, Rot

Our (Re)Generation Action Story

Box number 1 is Reuse. We can reuse by combining two worn out pickaxes to make a brand new pickaxe and you can reduce the trash. Also there will be less litter and you won't need to throw away stuff such as worn pickaxes.

Box number 2 shows Regrowing because the world is getting destroyed by trash and trees can't grow. Trees give us breath and bone meal is regrowing the trees. Also, regrowing trees is a metaphor for regrowing the world and stopping trash.

Box number 3 shows Reduce. It shows reduce because if you drop too much things it will lag the server. This is just like in real life. We will all get wiped out. If we reduce the amount of trash that is thrown on the ground, we will have less trash in the world.

Box number 4 shows Rot because a hamburger is rotting on the ground. Like in real life, if people just leave food on the ground, it will rot. If things keep rotting, it will be bad for the world because it will smell really bad and there will be insects attracted to the thing that is rotting.
