My 4Rs: Regenerate, Remake, Rejustified, and Refound

Pledge to the Animals

Oh, secret world the beauties you have brought,

Our kind can use but after it is only thrown without a thought.

Animals have lives too but aren't heard to us as our little problems makes us have a fuss.

Our sky which glitter aren't really as we think since most ocean animals die from the trash in a blink.

The smallest trash can travel great seas after this repairing, it cost big fees.

We have become cruel and selfish, as our animals gave us lives and want peace is our only wish.

Otherwise this story may never end, our plastic can never be away or sent.

Reusing your trash can make a new life, and a new art to express as we need to fix our mess.

We put our laziness behind and safe fully wrap our trash to throw

while prospering from this world of sorrow.

Cover the ocean, pollution and its bruise while trash will be gone from being loose.

We can change the world together while trash will be used again, thrown properly, and not on the streets ever.

My (Re)Generation Action Story:

All of my four R's say how we can remake the world into a better place not only for us but also the environment.
