### **My (Re)Generation Action Story:**

This song talks about how the Earth is starting to get progressively weaker with litter, toxic fumes, gasses, and the loss of trees. To help prevent this in the first place, we can think about what we throw away or what we use. We need to be aware of what is hurting the Earth and what we need to change. Some ways we rethink our waste is that we only take the amount of food we need so we don't waste our food and we also refuse toxic plastic bags so that we don't have to throw them away. This is why we need to come together and cooperate to make our planet a better place. Let's replant, recycle, remind, and react to what's going on in the world.
