## Our 4Rs Reflection

Our 4Rs are Reduce, Recycle, Renewable, and Respect.

As the saying goes 'an ounce of prevention is worth more than a pound of treatment.' Preventing harm to the Earth by Reducing our use of natural resources in the first place and therefore Reducing our impact on the environment is #1 on our list.

Recycle comes next as it is important that we salvage as much of the natural resources we have used as we can so that materials continue into the next generation of products.

A focus on using Renewable energies can curb our presently high use of nonrenewable sources such as fossil fuels. A focus on the use of Renewable natural resources is likewise promoted as well.

Ultimately, we must Respect the Earth and all forms of nature within. If we Respect it then we will Reduce our use, Recycle what we use, and use less destructive forms of energy such as Renewable sources. These 4Rs are either explicitly pointed out or implied in our song "Save The Earth."
