My 4Rs: Recycle, Rot, Rethink, and Reuse

By: Skye Singh 5th Grade, Mohr Elementary, Pleasanton

My 4 R's Rot, Recycle, Rethink, Reuse. I want the world to Rethink about what they do about the earth just like I do and many others. If we all do this then earth will become a better place. Recycle the plastic. Don't throw it in the landfill and don't throw it randomly. This will pollute our lands. Especially on the beach. It can get to sea animals which they would think is food and they eat it. Which will kill them. Which could become the great extinction of sea animals. Just like dinosaurs. Rot your food. If you don't rot the unfinished food you eat it will fill up our landfill. Which will make it leak more and more methane gas to the world. Soon the planet will be filled with trash just like in WALL-E. We also need to Reuse all the things we can. For example don't throw away in the landfill something broken that can be fixable. Paying the money to fix it is more worth it than polluting the world more and more. It will cost quadrillions of money to fix the world from a lot of trash if it happens. We need to Reuse much more. If you don't follow these 4R's the world won't be a better place. Do you want to live a happy life in the happiness of a clean world? Or a sad life in the sadness of a polluted planet. If you want to live happily then follow these very important 4 R's. It will do you and the planet a favor. So please start doing these 4 R's Today Right now right here.

My (Re)Generation Action Story:

I am apart of the (Re) Generation mainly because last year. I had a teacher who really cared about the planet and the ocean. She taught us everything about the world and pollution. I did this last year so I want to do this again. I always recycle and rethink and do all the stuff my 4 R's have to offer. I choose these mainly because I wanted to make my picture about how people don't Rethink, Rot, Reuse, and Recycle. Which is why I entered this contest again. I don't have a deep story but once I went to the beach and saw plastic all over the place. I felt very sad about the planet. Which is why i started doing these 4 R's before I went to 4th grade too. But then I was lucky I got Ms.Gahl because she did all this stuff for us. So now i'm doing it again.
