My 4Rs: Reuse, Recycle, Regenerate, Reimagine

My (Re)Generation Action Story:

A little girl is done drinking water in a bottle. Now the bottle has to leave. There are two places it can be. One option is landfill, and another is recycle bin. If it goes to the landfill, it will die and create methane. If the bottle goes to the recycle bin, it will get another owner and will not create methane. Which way should it choose?

My four Rs are Reuse, Recycle, Regenerate, and Reimagine. Reuse is for reusing the plastic bottle. Recycle is not throwing it to the landfill. In stead, you can throw the bottle in the recycle bin.

Regenerate is for not let the landfill take over our lovely earth and lives. Re imagine means that we can make our earth better and love it!
