My 4Rs: Regrow, Rebuild, Rethink, Recycle

My (Re)Generation Action Story:

My 4Rs are regrow, rebuild, rethink, and recycle. I chose Regrow because we can grow more plants to make the earth healthy and natural instead of leaving it polluted and unhealthy. I chose Rebuild because we can “remake the earth” and what I mean by that is by stopping unhealthy things, polluting our environment, and throwing trash wherever we want, we can make the earth healthier and a better place for humans and animals. I chose Rethink because we need to rethink our choices we make and we need to think about how it affects our Earth.

Lastly, I chose Recycle because we can make new things out of things that were done with. For example, we can make a bag with juice boxes.
