Our 4Rs: Rechargeable, Replace, Repurpose,

Our (Re)Generation Action Story:

There are lots of simple things that we can do for our earth. Our family tries to reduce waste by using rechargeable batteries, putting a water filter so we can reduce buying plastic water bottles, and we should recheck and reorganize our freezer, fridge, and pantries before buying to avoid food and plastic waste. And lastly, we decorate our home by repurposing the tree stump from the tree that fell close to our house.
