Our (Re)Generation Action Story:

We chose our R's (and we choose our actions) in terms of what we think makes the biggest difference for climate change. Reminding people to vote = Electing climate-friendly legislators who will pass rational laws that support life on this planet rather than profits of the already-wealthy. Reaching out to reinforce the actions of other groups = building alliances to create a movement. Replacing refrigerants = stopping greenhouse gasses with the high GWP. Re-thinking flying to reduce emissions - limiting a form of transportation that pollutes the most, is not readily made electric, and is available primarily to privileged people. (80% of the people on the planet have never been on an airplane)
