SUBJECT: Legislative Positions for 2016

SUMMARY

2016 is the second year of the 2015/2016 legislative session and through our contract lobbyist we are tracking several bills that are in different stages of the legislative process. To date we have identified 24 bills of possible interest to StopWaste. We are recommending a position of support on 17 bills (two of which have already died), a watch position on 6 bills and an oppose position on one bill. The attached excel spreadsheet lists the bills, provides a short description, identifies the status of the bills, and includes recommended positions. Several bills are still in “spot” language form and will only be able to be analyzed once operative language is inserted.

DISCUSSION

In November, 2015, the Waste Management Authority Board approved these three legislative priorities for 2016: 1. Extended Producer Responsibility (EPR); 2. Organics regulation and legislation; and 3. Environmentally Preferable Purchasing. The following provides a discussion on our priority areas and a list of the bills we are recommending positions on. The attached spreadsheet contains more detail on the bills.

1. Extended Producer Responsibility

AB 45 (Mullin) Household hazardous waste (oppose) This bill prioritizes curbside household hazardous waste programs over other programs. AB 939 already requires local governments to have a plan for recycling HHW. Local governments should have the authority to determine whether drop off or curbside is the most efficient program. Curbside programs in the Bay Area have a lower participation rate than the Alameda County drop-off facilities. This bill takes attention away from the real need which is shared manufacturer responsibility for disposal costs of HHW and places all the burden of costs on local governments. This is being considered an anti-EPR bill. California Product Stewardship Council (CPSC) has an oppose position as do many other local governments.

AB 2039 (Ting) Sharps (support). This bill would create an EPR system for used sharps. It died in committee, however Assembly member Ting is dedicated to addressing this issue, and may look for another vehicle to bring this forward.

2. Organics

After several bills passed in the last two years related to organics, including phasing out diversion credit for green waste used as alternative daily cover (ADC) at landfills, requiring commercial businesses to recycle their organics and requiring local governments to identify processing capacity needed for their organics generation, this legislative year has been quieter on the topic of organics diversion. On the regulatory front, however, CARB has proposed developing a state regulation to get organics out of landfill by 2025 as a way to reduce short lived carbon pollutants, or more specifically, in the case of landfills, methane. The BAAQMD is including support for more sustainable landscaping in their Regional Clean Air Plan. The bills that do address organics this year, (SB 367 and AB 2525) focus on the use of compost for its multiple greenhouse gas reduction benefits including carbon storage and water conserving features.

3. Environmentally Preferable Purchasing

The only bill addressing environmentally preferable purchasing this year is AB 2530 which requires plastic bottle manufacturers to indicate through labeling the percentage of postconsumer recycled content in the container.
